

Te Kiba n raku Hackathon

Theme: Visibility & efficiency through technology

“The swordfish’s (Te raku) ability to jump high over the water to enhance its visibility and efficiency over its prey, inspired the theme for the Ministry’s hackathon, whereby utilizing technology as a means of emerging over its operations to enhance visibility and efficiency.”

Objective: To invite tech enthusiasts to develop software collaboratively for the two key challenges below. The product could either be in the form of a desktop, mobile or web application.

Challenges Key Focus Areas

- MFMRD Revenue Dashboard
- MFMRD Project Dashboard Management System

Prizes

- 1st prize: \$6000 AUD
- Participation prize: \$2000 AUD
